

Seven levels. One goal. Chest Pain Competency. **impULSE**[®] ECG Competency Series.

Are you looking for ECG and Chest Pain Education to make your life easier? **impULSE**[®] is a web-based, amazingly interactive ECG and chest pain education and competency program addressing the educational needs of all levels of staff from monitor techs to physicians. **impULSE**[®] is a 24/7 solution to accelerate and complete your chest pain education!

How are you meeting your Chest Pain and ECG Competencies?

impULSE[®] is the **ONLY** program meeting all the key educational elements required annually for Accreditation by the Society of Chest Pain Centers. With 12 lead pre-hospital ECGs being performed by Paramedics and the increasing numbers of accredited Chest Pain Centers, the seven levels of **impULSE**[®] were designed to fulfill educational requirements and provide critical competencies.

What are the two most difficult issues you face today?

Staff retention and Competencies

impULSE[®] can help with both! By investing in your staff, you provide much needed education and competencies, conveying your organizations appreciation and support. Happy, confident, competent and appreciated staff feels valued and empowered, and will stay on in your organization!

Testing after each level provides robust administrator reporting and a passing score allows an individual to print a course completion and or continuing education certificate.

The seven levels of **impULSE[®] include:**

- Heart Basics
- Obtaining ECGs and Troubleshooting
- Heart Rhythms and Interventions
- 12 Lead ECGs
- Acute Coronary Syndrome
- Advanced and Special Situations
- Reference Library
